

# 2<sup>nd</sup> PCNS Passive Components Networking Symposium

Sep 10-13<sup>th</sup> 2019, Bucharest, Romania

## INVITATION

---

**Ing. Tomáš Zedníček Ph.D.**  
General PCNS Chair  
European Passive Components Institute

Passive Components Networking Symposium PCNS is a bi-annual symposium purely dedicated to passive electronic components and its applications organised by EPCI in co-operation with a European university. The first edition of PCNS was held in 2017 in The Czech Republic hosted by Brno University of Technology. It was a great event with pleasure talks to people around the passive components industry.

It confirmed, that even at digital era, it is still very important for people to meet face to face enabling multi-level human interactions that may raise new ideas for your own thinking, knowledge growth or innovation.

The second PCNS 2019 edition hosted by Politehnica University of Bucharest, and APTE will be held in September 2019 in Bucharest, Romania. The scope of the symposium covers passive components in all its applications from commercial, industrial, automotive to high rel, medical or aerospace.

### **PCNS 2019 Program Highlights:**

PCNS 2019 programme committee consisting of experts from leading passive component manufacturers, ESA / NASA agencies, universities and impacted magazine promise selection of well-balanced share of academic and industry **presentations** with overview of new passive components and ongoing research projects from academia..

The two pre-event **workshops** on *Advanced Passive Components* and *Passive Components Mounting Guidelines* will introduces some practical tips for new designs and their use.

**Keynote presentation** is confirmed by Mr. Alexander Gerfer, CTO and executive board member of Würth Elektronik eiSos. Two other keynote presentations from leading automotive electronics supplier and passive component manufacturer are under confirmation.

**Panel Discussion Topic** has been selected based on current industry issue with *MLCC Class II DC BIAS & Ageing Capacitance Loss*. The invited panellists for the open discussion are leading passive component manufacturers and its customers.

And of course, we will have a room for pleasant networking to meet old mates and new friends during **Welcome Drink** and **Gala Dinner** social events.

Thus, on behalf of EPCI and organising team, I would like to invite everyone with interest to passive components to join us at the next PCNS. I am looking forward to see you in September 2019 in Bucharest !.

**Tomáš Zedníček Ph.D.; March 2019**

I would like to thank also all sponsors and exhibitors who are supporting and enabling PCNS:
